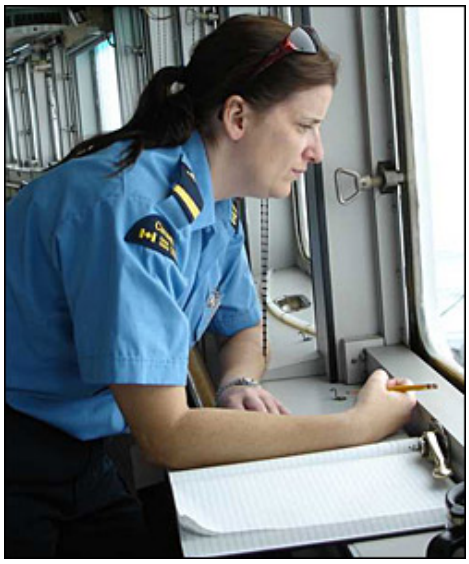
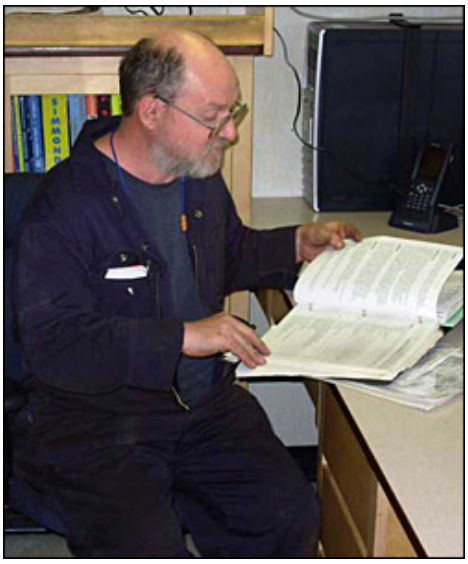
Beaufort Gyre Exploration Project: Dispatch 19: Faces of the Louis III

Rick Krishfield
August 23, 2006

The propellers are turning once again on the *Louis*, and we heading back to our mooring site to redeploy Mooring A tomorrow. Many long hours were spent by the Engineering Department resolving the problems, and on behalf of all of the scientists on board, we thank them for their dedica
Continuing the theme of crewmember photos implemented on Dispatches 5 and 12, here are more faces of the *Louis*.



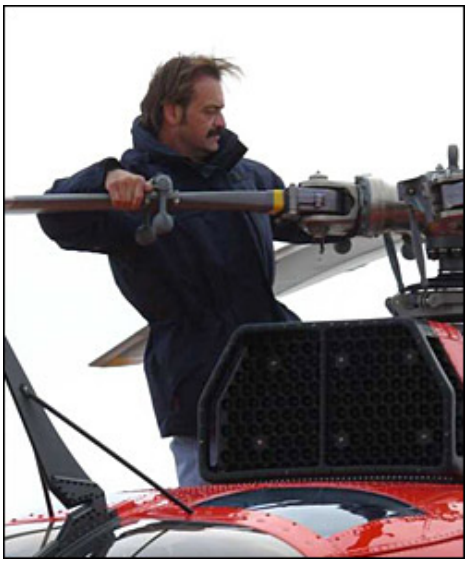
From the bridge, Second Officer Marie-Josee (MJ) Beaudoin notes activities occurring on the foredeck in the ship's log.



Engine Room Technician Jeff Doane consults one of many manuals in the Engineer's Office.

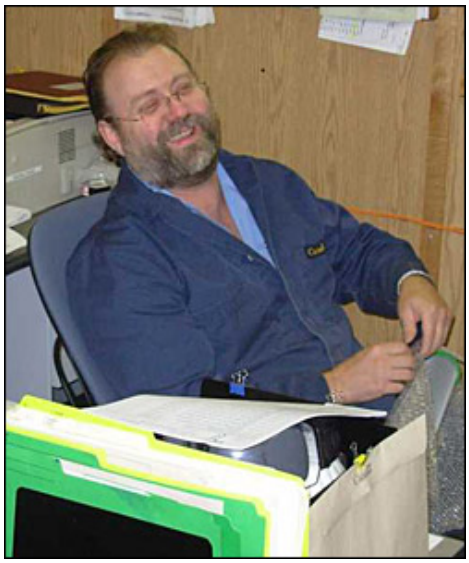
The "nerve center" of the *Louis* is the Logistic Office headed by Bill Brocklebank, who is responsible for all stores.

Engine Room Mechanic Raine Jones secures one of the foredeck vents for the blowers.



Following a reconnaissance flight, Helicopter Engineer Rob Locke tends to the blades prior to storing the aircraft in the hanger.

Joe Gurney performs Steward duties on the *Lou*



Storekeeper Mike Gaudet suggests that his inventory of ship's parts is like a genealogy of the *Louis*, with parent and children categories.

Experienced on other Canadian Coast Guard Icebreakers, this is Seaman Terry Rhyno's first cruise on the *Louis*.

Bosun Rico Amamio grapples with a tool for attaching to errant objects.
