MBLWHOI Library

» Visit the MBLWHO Library online

For over a century, the MBLWHOI Library has been the intellectual heart of the Woods Hole scientific community. Today the Library is internationally recognized as defining current trends and practices in marine information sciences and bioinformatics.

The Marine Biological Laboratory and the Woods Hole Oceanographic Institution maintain a vital partnership in the day-to-day operation of the MBLWHOI Library. The Library continues to build one of the most unique print and electronic literature collections in the biological, biomedical, ecological, and oceanographic sciences. The Library has broken the physical barriers of the charming village and surrounding waters of Woods Hole, to serve the cutting edge bio information needs of affiliated researchers worldwide, often no more than a single email message away.
