

Woods Hole Oceanographic Institution

1930 Society Field Trips

*Special events and field science experiences are available exclusively to members of the **1930 Society**. As a member, you will be invited to learn about and even help to conduct science fieldwork alongside Institution researchers. Detailed invitations with registration information will be sent to you six weeks prior to each gathering. For more information, call us at 508-289-4895.*

JUNE 2, 2014

Boston Harbor Science Excursion

Woods Hole Oceanographic researchers have been active in Boston Harbor and Cape Cod Bay for decades. On this expedition, guests will cruise with scientists who will discuss projects above and below the waterline, including coastal bluff changes, harbor pollution and marine mammal protection.

JULY 25, 2014

Sampling for Ocean Radioactivity in Woods Hole

With concern among the public over the plume of radioactive ocean water from Fukushima arriving on the West Coast of North America, WHOI marine chemist Ken Buesseler launched a citizen science website to monitor radiation in the ocean. He will outline the project, then lead field trip participants to the lab to demonstrate how water samples are analyzed.

AUGUST 22, 2014

Ocean Life in Woods Hole

On a three-hour excursion aboard our coastal research vessel, *Tioga*, Guest Investigator Rob Reynolds and 1930 Society members will deploy a variety of instruments to study marine life in Vineyard Sound.

SAVE THE DATE: JUNE 27, 2014, 4 p.m.

Associates Afternoon of Science

Our annual Afternoon of Science brings together scientists and supporters to explore the latest Woods Hole research. Keynote speaker Bernhard Peucker-Ehrenbrink will highlight his Global Rivers Observatory, a study of the world's most significant river systems. Learn more at www.globalrivers.org. During dinner, a number of other scientists will present posters regarding their work. In addition, new Associates will be welcomed to the Institution by Admiral Dick Pittenger for a dock tour at 2:30 p.m.
