

# Littoral Power Systems Inc.

**Low-Impact Clean Hydropower From Rivers and Tides**

July 2016

LPS is focused on low impact low-head and hydrokinetic power from rivers and tides

## Head-based

## In-current

High-head hydro

Low-head hydro

Low-head Run of River

Hydrokinetic Run of River

Hydrokinetic Tidal

HKE pelagic

>20M of head

<20M of head

minimal impoundments

no impoundments

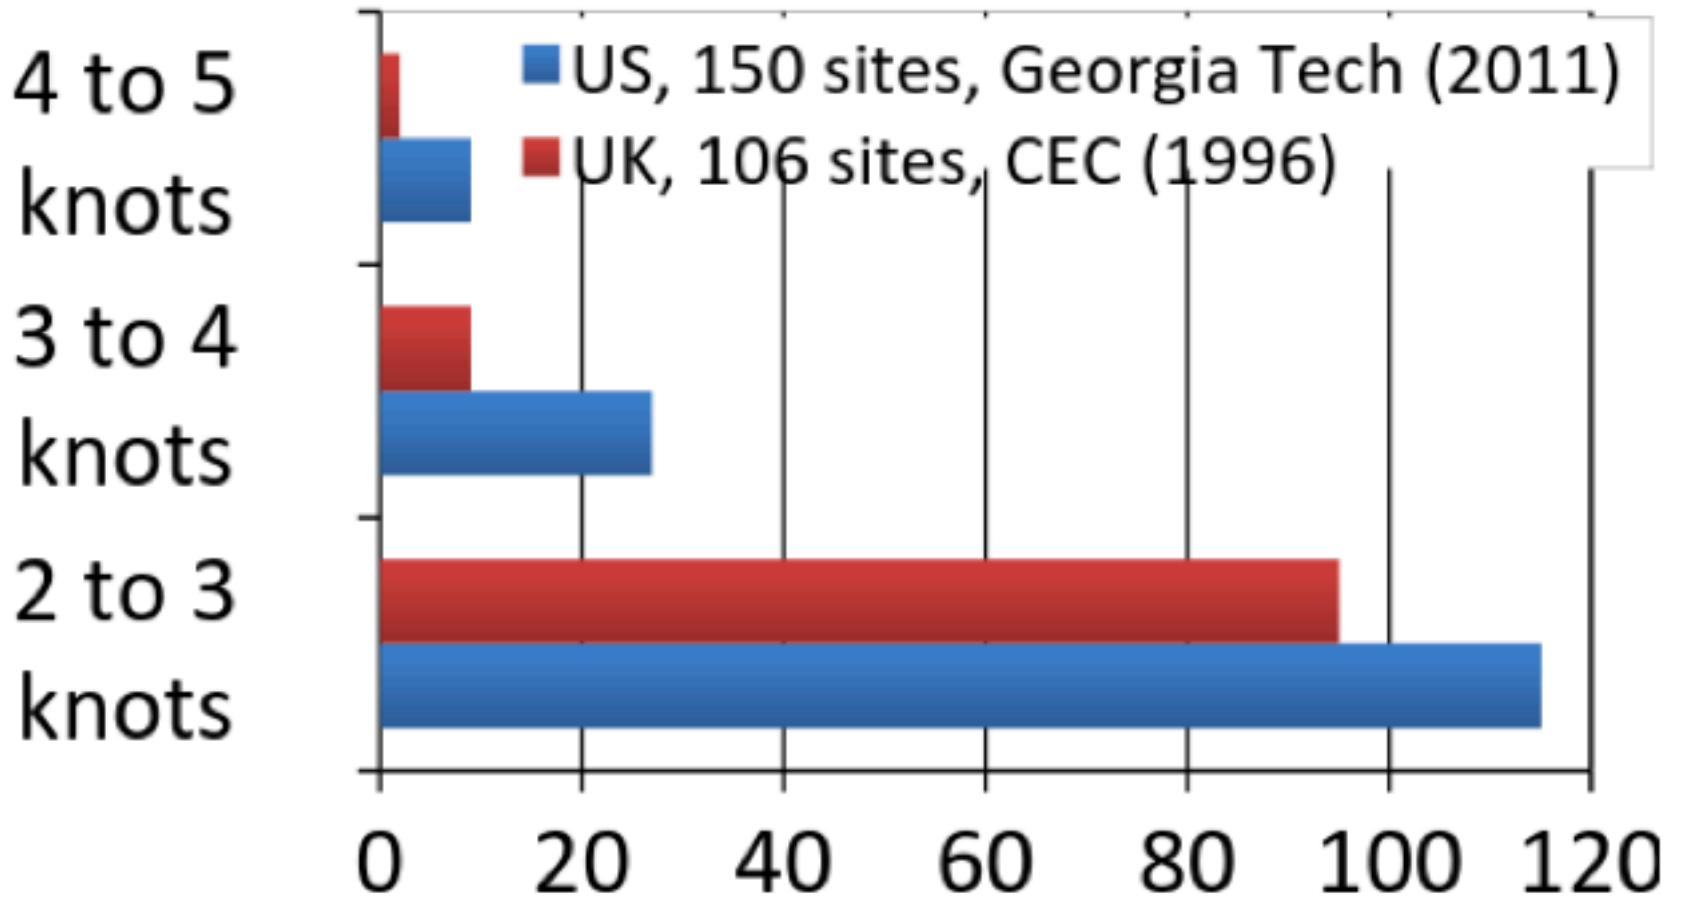

coastal; reversing current

deep ocean

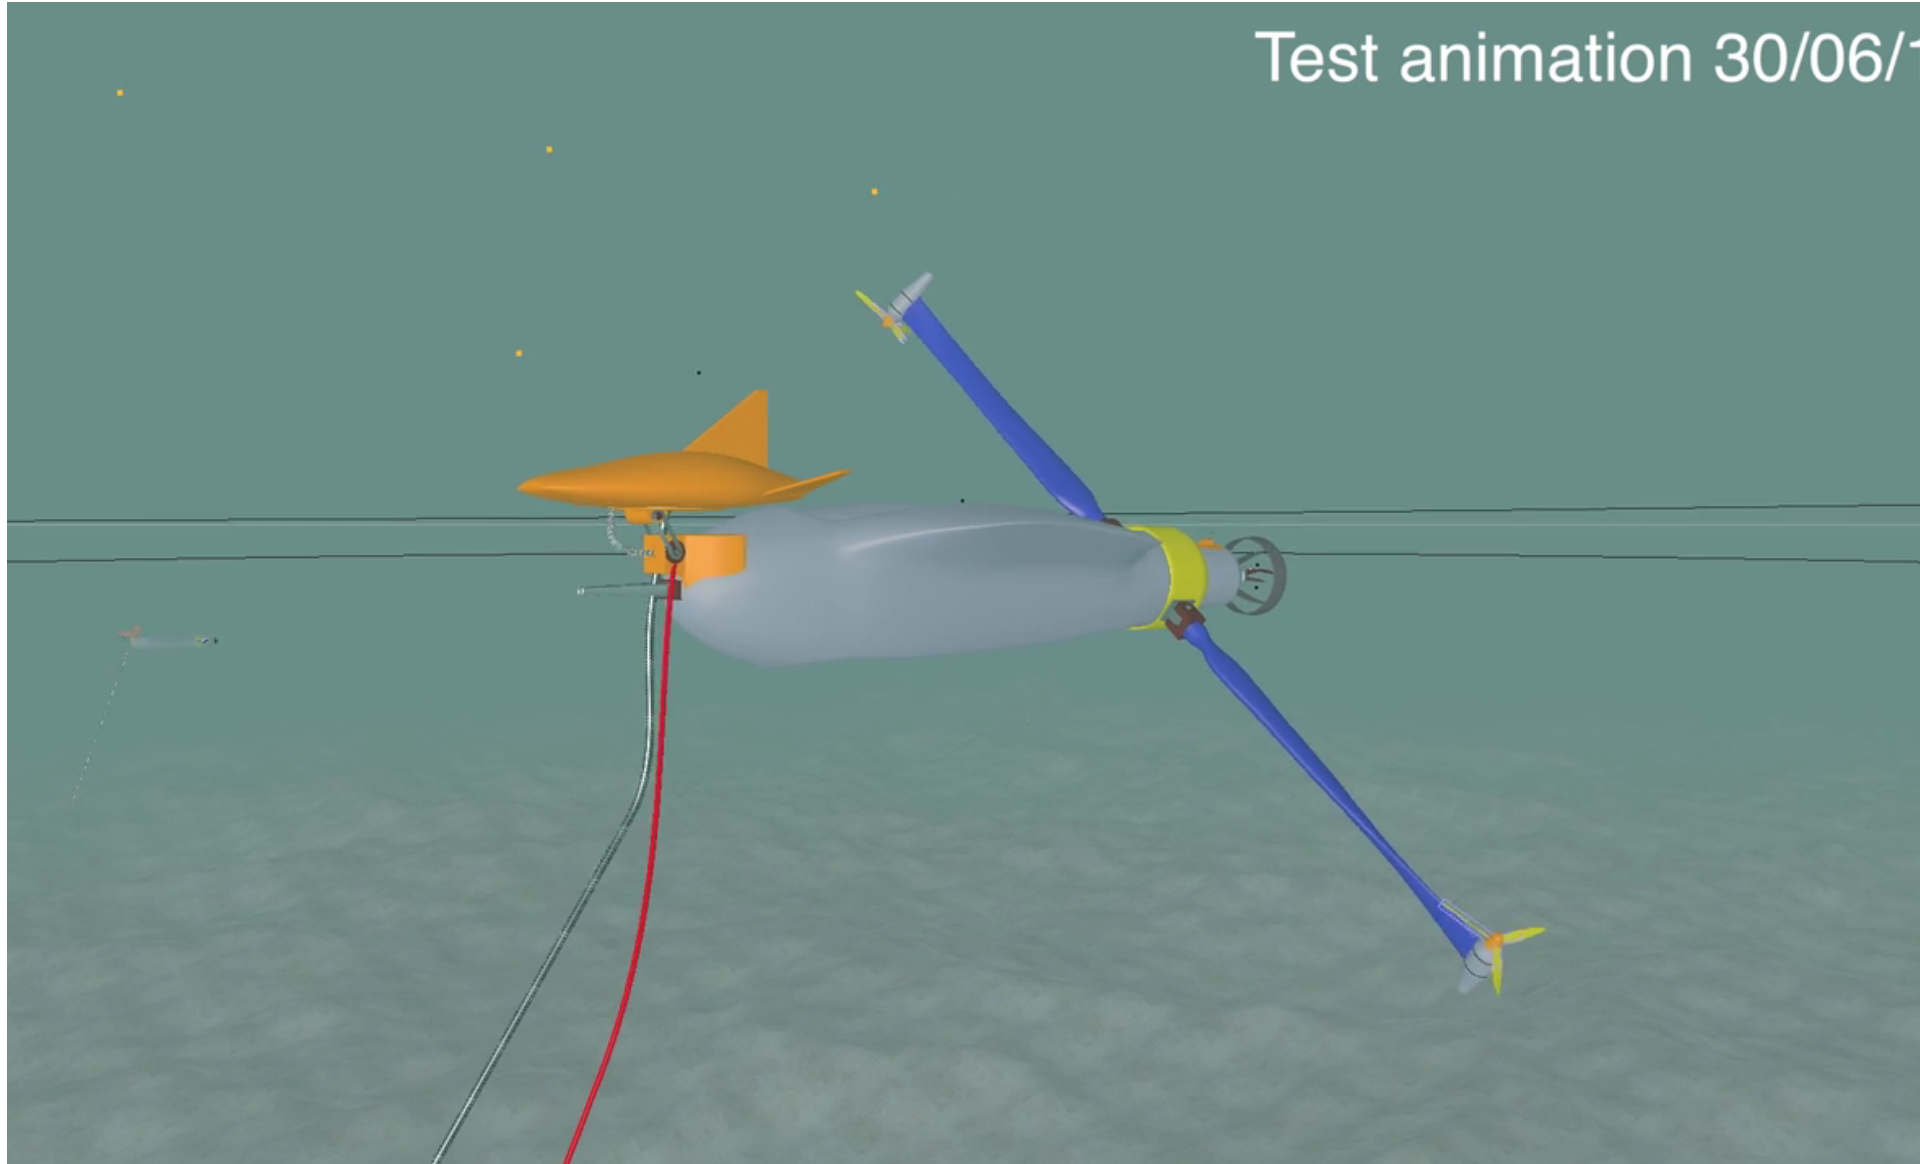

## **Exploit power of the standardized module, as proven in the solar industry**

- **Deliver output through multiple common devices rather than single device**
- **Use common marine equipment and cargo logistics**
- **Minimize downtime with replaceable units (RxR)**
- **Share and repurpose componentry wherever possible**

# Tidal Sites
