

CICOR

Research

CICOR's primary mission is to help bring WHOI's world-renowned scientific capabilities to bear on some of NOAA's primary missions and research priorities. These include advancing understanding of the ocean's role in climate change and of the processes that affect the coastal ocean and marine ecosystems. Such advances in understanding will enable NOAA to monitor the ocean and mitigate ocean-related societal impacts.

[Researchers](#)

Information about researchers funded by CICOR and those in support of NOAA goals and vision.

[Themes](#)

The research activities of CICOR are organized around three themes—coastal hazards, health of ocean ecosystems, and climate forecasting.

[Projects](#)

View projects funded through CICOR by researcher, by theme, or by date.
