

Woods Hole Oceanographic Institution Education

The MIT/WHOI Joint Program celebrates its 40th anniversary in 2008. This program is the cornerstone of WHOI's academic activities, having granted almost 800 degrees to date. Interestingly, postdoctoral and summer undergraduate projects have been ongoing at WHOI even longer than the Joint Program. It is the combination of these strong and competitive education programs which has enabled the Institution to be a leader in ocean science research and education.

[Graduate Programs](#)

Woods Hole Oceanographic Institution partners with MIT to form one of the premier marine science graduate programs in the world.
