

## Biogeochemistry: Tracy Mincer

Research Interests of Tracey Mincer, Associate Scientist (Marine Chemistry and Geochemistry)

- Determining in situ selective pressures on marine microorganisms
- Elucidation of chemical communication and its role in coordinating microbial degradation of particles in the water column
- Marine microbial natural products and their role in protist grazing deterrence and quorum sensing disruption
- Use of heterologous expression techniques to determine heavy metal biotransformation
- Gaining a deeper understanding of the epibiont community of the bloom-forming cyanobacteria *Trichodesmium*
