

Dr. Amy Bower: News & Events

Amy Bower Receives the Chrysalis Award

In October 2011, the [Center for Vision Loss](#), an agency serving visually impaired people of eastern Pennsylvania, awarded their first-ever "[Chrysalis Award](#)" to WHOI scientist Amy Bower. The award, which honors "a blind or visually impaired person who has transformed the world around them," and was given to Amy to recognize her achievements in oceanography and outreach. Though a rare October snowstorm forced cancellation of last fall's award ceremony, Center for Vision Loss, Executive Director, Doug Yingling came to WHOI, and presented Amy with the award on September 17, 2012.

OceanInsight

As an oceanographer who has been legally blind for fourteen years, I am pleased to be working in collaboration with [Perkins School for the Blind](#) in Watertown, Massachusetts on project [OceanInsight](#). The goals of the collaboration are to communicate the importance of understanding how the earth works, instill the excitement of oceanographic research, and introduce Perkins students to careers in the geosciences that they might not otherwise consider as accessible to them.

Amy Bower receives the "Unsung Heroine Award," May 2010.

Accompanied by WHOI volunteers, students from Perkins School for the Blind toured R/V *Knorr* on a recent visit. They heard about the bridge from physical oceanographer Amy Bower (right), who invited the students to WHOI and created a special Web site as part of an outreach project to accompany her research.
