

Looking for Climate Change : The schools and classrooms joining us on our South Pacific voyage

Oct. 29th 2009

During our three and half months as sea, while we are making observations of the chemical and physical characteristics of the South Pacific, through this website we will be in touch with a number of different of schools. We invite other schools, classrooms and individuals to join us as well, through our email link.

In talking with the teachers and students we have come up with a number of different questions and topics of interest which we could discuss. These include:

- What are our jobs while on board?
- What are the instruments we use?
- What we do with all the water we collect?
- How do we use the observations?
- Topography
- Pressure and density
- Southern hemisphere seasons
- Southern hemisphere night sky
- Weather
- Time zones
- What biology do we see?

As part of our collaboration with the Bridgeview School, we will be sending styrofoam cups decorated by the EII students down to the bottom of the ocean. What do you think will happen to them?

What subjects would you like to hear about? Send as an email. You can click on the button above or write to:

clivar-p6@rv-melville.ucsd.edu

This email address has been corrected. (12/15/09)

Your cups have gone down. Although the Bridgeview students got a chance to decorate their cups, we have made at least two cups for each of the other schools. Most of these have already been sent down and just for the fun of it we sent half of them down to 4000 m and the rest to 6000 m (in Kermadec Trench). We took before and after pictures and will starting loading them into the website. Be patient, the internet isn't always with us.

Downingtown Middle School

Welcome to the [Downingtown](#) 7th grade Life Science & 7th-8 th Ecology Club

Lawrence School - 8th Grade Falmouth, Massachusetts

Welcome to Mr Porto and Mr Laquidara's physical science classes.

Falmouth Academy Falmouth, Massachusetts

Welcome to the [Falmouth Academy](#) 9th Grade Earth Sciences class.

Bridgeview Montessori School Sagamore, Massachusetts

Welcome to the [Bridgeview](#) EII Class (4th-6th Grade).

Check out the cup experiment.
