

Beaufort Gyre Exploration Project: CTD and geochemistry

The CTD and geochemistry data were produced by researchers at the Institute of Ocean Sciences, Fisheries and Oceans Canada. The principal investigators are Bill Williams, Fiona McLaughlin, Eddy Carmack, Sarah Zimmermann, Michiyo Kawai (Tokyo University of Marine Science and Technology) and Chris Guay. The bottle-calibrated data from each CTD down cast are saved in individual spreadsheets and archived in a single zip file for each cruise along with documentation specific to the particular data set. Geochemistry data are archived in separate spreadsheets. If you wish to use this data, we recommend reading the [Fisheries and Oceans Canada data reports](#) and you are also recommended and welcome to contact [Bill Williams](#).
