

MVCO ACOUSTIC USER INFO

In order to provide reasonable assurance of the success of all MVCO user research programs we are asking *all* users of acoustic devices (even ADCPs) to provide the following information:

Device_____

Center frequency(s)_____

Bandwidth (-3 and -10 dB levels)_____

Source level _____

Location of the source (position relative to the Node or C-Blast Tower, depth & altitude)

Type of transducer (i.e., directional or non-directional)_____

If directional (beam pattern and orientation) (e.g., 45 degree cone pointing up)_____

Type of Transmission (i.e., pulsed or continuous) _____

If pulsed transmission, pulse length, repetition rate _____

Long-term Duty Cycle (e.g., on for 10 minutes at the start of every hour)_____
