

OTZ Postdoctoral Scholar Fellowship for 2019-2020

The **Ocean Twilight Zone (OTZ)** project will award a fellowship focusing on midwater ecosystems and processes, including their biomass, biodiversity, life histories and behavior, trophic interactions, links to the global carbon cycle, and ways to engage scientists with stakeholders ranging from the general public to global decision-makers. See: <https://twilightzone.who.edu/>

- PROGRAM** Researchers at Woods Hole Oceanographic Institution (WHOI) are undertaking a large-scale, comprehensive exploration of the twilight zone designed to develop a new understanding of this important ecosystem, laying the groundwork for long-term sustainability of human activities that may affect it. You are invited to apply for an OTZ Postdoctoral Scholar Fellowship for any project related to the themes of this program. These include: 1) quantifying and understanding the distribution of twilight zone biomass and biodiversity; 2) uncovering food web linkages within the twilight zone and between the twilight zone and other ocean realms; 3) determining the life histories and behaviors of twilight zone animals; and 4) understanding the role of the twilight zone and its inhabitants in the global carbon cycle. Interweaved through these science themes, we will apply state-of-the-art and emerging technologies. Further, we will engage scientists with stakeholders ranging from the general public to global decision-makers. A successful candidate may choose a research project with faculty in any of WHOI's five science and engineering departments and the Marine Policy Center or any combination thereof, but preference will be given to individuals with a multi-disciplinary focus.
- ELIGIBILITY** New or recent recipients of a doctoral degree with interests in the oceanographic sciences or engineering are eligible. Usually, scientists with more than three to four years of postdoctoral experience are not considered eligible for these awards.
- STIPEND** Scholarships are awarded for 18-month appointments. Successful applicants will receive a stipend of \$60,000 per year, wellness and relocation allowances, as well as a modest research budget.
- APPLICATION** Completed applications will be accepted up to **September 20, 2018** for consideration for Postdoctoral Scholar Awards for 2019-2020. In addition to the application form, the following are required: a current CV or resume; a minimum of three non-WHOI recommendations; a concise statement describing research interests, in particular those that the applicant would like to pursue at the Woods Hole Oceanographic Institution, as well as more general career plans; and a brief synopsis of their doctoral dissertation. Announcement of awards will be made by December 1.
- TENURE** Recipients of awards can initiate their study and research period at the Institution any time after **January 1, 2019** and before **December 1, 2019**.

Further information and application forms may be obtained through the Academic Programs section of the WHOI web pages at <http://www.who.edu/postdoctoral>, or by contacting:
