INVASION OF OCEAN THE BODY SNATCHERS

In the Gulf of Mexico, a parasitic barnacle tunnels into mud crabs and turns them into zombie nursemaids for the parasite's offspring. Fifty years ago it invaded the mid-Atlantic, where it now infects over 70% of crabs in some areas. Join us to chat about how castrating parasites, biological invasions, and evolutionary biology collide in a real-life invasion of the body-snatchers lurking just beneath the surface.

WEDNESDAY

Apr. 24, 2019

6:30–8:00 p.m.

Tavern on the Wharf

6 Town Wharf, Plymouth, MA

Doors open at 6:00 p.m.

Join our Facebook live stream at 6:20pm
