

OCEAN ENCOUNTERS

VIRTUAL SERIES FROM WOODS HOLE OCEANOGRAPHIC INSTITUTION

OCEANS BEYOND EARTH

FROM EARTH'S DEEP OCEAN TO THE SEARCH FOR EXTRATERRESTRIAL LIFE

Wednesday, June 10 | 7:30 – 8:30 p.m. EDT

Earth's ocean is essential to life and may have even given rise to life on our planet billions of years ago. We now know that vast oceans of liquid water also exist beneath the icy shells of moons in our own solar system. These ocean worlds provide compelling targets in the search for extraterrestrial life, perhaps within the next human generation. Join us for a stimulating discussion of how the exploration of the depths of our ocean can help inform the search for life beyond Earth.

FEATURED SPEAKERS

Kevin Hand
NASA Jet Propulsion
Laboratory
astrobiologist

Julie Huber
WHOI marine
microbiologist

Chris German
WHOI marine
geoscientist

SPECIAL GUEST

Eugene Mirman
Comedian
