

OCEAN ENCOUNTERS

VIRTUAL SERIES FROM WOODS HOLE OCEANOGRAPHIC INSTITUTION

HURRICANES

The Future of Coastal Cities

**Dr. Ayana
Elizabeth Johnson**
Marine biologist,
founder of Ocean Collectiv
and Urban Ocean Lab

Event Details

Coastal cities lie at the intersection of many issues—ocean and climate, ecosystems and human infrastructure, and a rapidly growing population on a constantly changing landscape between land and sea. Our safety, economic security, and cultural growth depend on us learning how to live more wisely in this complex landscape. Sea-level rise and other fundamental changes are already reshaping coastal cities around the globe. Whether this evolution is incremental or, in the case of hurricanes, present dramatic and often wholesale change, we will need multidisciplinary, collaborative solutions, that focus on supporting communities through uncertain times.

With host **Dr. Véronique LaCapra**

Dr. Jeff Donnelly
WHOI senior scientist
and marine geologist
