

Woods Hole Oceanographic Institution

2020 Summer Lecture Series

(all lectures in remote format)

Date	Speaker	Department	Title
June 10	Joel Llopiz	Biology	"Early life stages of fish, careers and systemic change"
June 17	Isabela Le Bras	Physical Oceanography	"Chimneys into the deep ocean: Measuring the ocean circulation around Greenland"
June 24	Adam Subhas	Marine Chemistry and Geochemistry	"The Marine Calcium Carbonate Cycle And Its Role In CO ₂ Neutralization"
July 8	Christie Hegermiller	USGS	"Hurricane waves in the coastal ocean"
July 15	Vashan Wright	Geology and Geophysics	"Neotectonics of Eastern Jamaica and the Resistance of Sands to Earthquake-Triggered Deformation"
July 22	Britt Raubenheimer	Applied Ocean Physics and Engineering	"Surf, Sand and Seaside Storms"
July 29	Collin Ward	Marine Chemistry and Geochemistry	"Yellow Sun is Shining in the Afternoon: Alteration of Organic Carbon in Sunlit Surface Waters"
August 5	Maria Pachiadaki	Biology	"Marine Microbes: Small size, large impact"
August 12	Bruce Strickrott	Alvin Group	"Overview of National Deep Submergence Vehicles and Alvin Operations"
August 19	G. (Jake) Gebbie	Physical Oceanography	"The deep ocean's memory of Earth's past climate"
