Heidi Sosik
OTZ Lead Scientist
and Biologist,
WHOI

Dive with us into the ocean twilight zone—the weirdest place on Earth. This vast, dark, barely explored layer of the ocean is home to countless weirdly wonderful creatures whose uniqueness also gives them superpowers to survive in a world of darkness, extreme pressure, frigid cold, and super-powered predators. The twilight zone is a place of wonder, mystery, and abundance that reminds us our choices mean the difference between a future of loss and sustainability.

Hosted by **Véronique LaCapra**.
