

Woods Hole Oceanographic Institution
2021 Summer Lecture Series
(all lectures in remote format)

Date	Speaker	Dept	Title
June 2, 2021	Melisa Diaz	Geology & Geophysics	"There and back again: a journey in polar exploration and terrestrial biogeochemistry"
June 9, 2021	Young-Oh Kwon	Physical Oceanography	"Role of the ocean and atmosphere heat transport in the Arctic Amplification"
June 16, 2021	Sheri White	Applied Ocean Physics and Engineering	"The Ocean Observatories Initiative (OOI): Building and deploying moorings to make long term measurements in the ocean"
June 23, 2021	Tom Bell	Applied Ocean Physics and Engineering	"Multiscale approaches for reconciling competing mechanisms of ecosystem dynamics"
June 30, 2021	Carolyn Tepolt	Biology	"Invaders, body-snatching, and hydrothermal vents: how crabs adapt to challenging environments"
July 7, 2021	Neel Aluru	Biology	"Oceans and Human Health: Understanding the mechanisms of toxicity of chemical stressors in the environment"
July 14, 2021	Melina Kourantidou	Marine Policy Center	"From Arctic marine ecosystems to fisheries, invasive species and human wellbeing"
July 21, 2021	Alan Seltzer	Marine Chemistry and Geochemistry	"How cold was the last ice age?"
July 28, 2021	Shannon Valley	U.S. Geological Survey - Woods Hole	"Climate change, mitigation and resilience: from the ocean to the coasts"
August 4, 2021	Stephanie Moore, NOAA	Biology Dept Steinbach Scholar	"Harmful algal blooms, fisheries, and fishing communities on the U.S. West Coast" (talk at 12pm, noon)
