## Woods Hole Oceanographic Institution 2021 Summer Lecture Series

(all lectures in remote format)

Date	Speaker	Dept	Title
June 2,	Melisa Diaz	Geology &	"There and back again: a journey in polar
2021		Geophysics	exploration and terrestrial
			biogeochemistry"
June 9,	Young-Oh	Physical	"Role of the ocean and atmosphere heat
2021	Kwon	Oceanography	transport in the Arctic Amplification"
June 16,	Sheri White	Applied Ocean	"The Ocean Observatories Initiative (OOI):
2021		Physics and	Building and deploying moorings to make
		Engineering	long term measurements in the ocean"
June 23,	Tom Bell	Applied Ocean	"Multiscale approaches for reconciling
2021		Physics and	competing mechanisms of ecosystem
		Engineering	dynamics"
June 30,	Carolyn Tepolt	Biology	"Invaders, body-snatching, and
2021			hydrothermal vents: how crabs adapt to
			challenging environments"
July 7,	Neel Aluru	Biology	"Oceans and Human Health:
2021			Understanding the mechanisms of toxicity
			of chemical stressors in the environment"
July 14,	Melina	Marine Policy	"From Arctic marine ecosystems to
2021	Kourantidou	Center	fisheries, invasive species and human
			wellbeing"
July 21,	Alan Seltzer	Marine Chemistry	"How cold was the last ice age?"
2021		and Geochemistry	
July 28,	Shannon	U.S. Geological	"Climate change, mitigation and
2021	Valley	Survey - Woods	resilience: from the ocean to the coasts"
		Hole	
August	Stephanie	Biology Dept	"Harmful algal blooms, fisheries, and
4, 2021	Moore, NOAA	Steinbach Scholar	fishing communities on the U.S. West
			Coast" (talk at 12pm, noon)
