We've been nominated!

WHOI receives a Webby Award nomination for its virtual series Ocean Encounters. [Vote today!](#)

Tracking baby fish for better reef conservation

To improve marine protected areas, WHOI scientists study the traffic patterns of juvenile reef fish

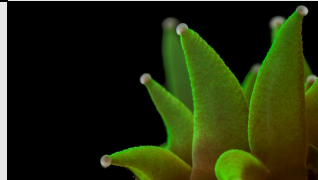

Image of the week: "A mucus feeder"

This pteropod produces a sticky net to snag passing particles and then wraps them up like a taco for food

Why are corals so colorful?

Did you know that a coral's bright pigment can serve as a kind of sunscreen from UV rays?
